SUMMARY

During my 1.5 years of work experience as a data processor, I gained an interest in web development technology. My passion is to reach out to the global community through building web applications. As a full-stack developer, I hope to bridge the access to all, whether for UX or clean back-end code. I have attended numerous independent online courses related to it, but in the end, Lighthouse Labs Coding Bootcamp is the one that gave me a proper pathway to learn efficiently. through adaptability, resilience, and fast pace 12-week curriculum.

PROJECTS

Haime

Haime is an Online Store App. It's a full-stack application with React as a front-end and Python Django as a back-end REST API

Ez-League

Collaboration Project with my 2 other colleagues. Ez-League is a Sports League manager App. with React Front End, Tailwind CSS, Express JS, and PostgreSQL
